

Team Member Essentials

1. Basic Requirements

The following prerequisites apply to all team members.

Hardware

Any one of the following:

- A computer running Windows 10 or later
- A computer running macOS 13 or later

Network Environment

You need a network environment that can access Android support resources.

- Android support: <https://support.google.com/android>

Applications

- Web browser (Chrome, Edge, or Safari)
- LocalSend

Online Accounts

- Email address (@gmail.com or @outlook.com recommended)
 - Create a Gmail account:
<https://support.google.com/mail/answer/56256>

- Create an Outlook account: https://outlook.live.com/mail/?prompt=create_account
- GitHub — <https://github.com/>
- Onshape — <https://www.onshape.com/>

In addition, 3D Modeling & Design, Hardware & Build, Programming, and Outreach & Public Relations each have their own supplementary requirements.

2. Environment Setup

The following environment must be configured before you begin. If you have any questions, please consult an administrator.

Web Browser

Install it yourself. We recommend Chrome.

Chrome download: <https://www.google.com/chrome/>

Websites to know, read, and bookmark:

Name	URL
Current Game and Season Materials	https://ftc-resources.firstinspires.org/ftc/game
FIRST Tech Challenge documentation	https://ftc-docs.firstinspires.org/en/latest/index.html
FTC AI	https://ftc-cmchatbot.firstinspires.org/
Techno Trojans	https://www.fruitportrobotics.org/
FTC Event Web — Team 32477	https://ftc-events.firstinspires.org/team/32477
32477 — FTCScout	https://ftcscout.org/teams/32477

Name	URL
GitHub FTC 32477	https://github.com/ftc32477

Network Environment

LAN

The workspace is equipped with wired and wireless local area networks. The wireless network is named `BNDES-FTC`, the gateway is `192.168.3.1`, and the wireless standard is 802.11ax.

Ask an administrator for the password.

Internet

Please consult an administrator for specific instructions.

LocalSend

LocalSend is the LAN file transfer tool adopted by our team.

Installation (using v1.17.0 as an example):

For **iOS**: open <https://apps.apple.com/us/app/localsend/id1661733229> and install directly.

1. Open <https://localsend.org/en/download>
2. Or go to the GitHub repository:
<https://github.com/localsend/localsend/releases>
3. Scroll down and click "Show all assets" in the Assets list of the latest release to display all available builds
4. Download the build matching your platform and install it

Platform-specific builds:

- **Android:**
 - `-android-arm32v7.apk` : built for 32-bit ARM v7 CPU architectures
 - `-android-arm64v8.apk` : built for 64-bit ARM v8 CPU architectures

- `-android-google-play.apk` : built for the Google Play Store (may require Google Mobile Services)
- `-android-x64.apk` : built for 64-bit x86 architectures
- **Linux:**
 - `-linux-arm-64.deb` : Debian package for 64-bit ARM (Debian/Ubuntu and derivatives)
 - `-linux-arm-64.tar.gz` : generic tarball for 64-bit ARM Linux
 - `-linux-x86-64.AppImage` : AppImage executable for 64-bit x86 Linux
 - `-linux-x86-64.deb` : Debian package for 64-bit x86 (Debian/Ubuntu and derivatives)
 - `-linux-x86-64.tar.gz` : generic tarball for 64-bit x86 Linux
- **Windows:**
 - `-windows-x86-64.exe` : installer built for 64-bit x86 architectures
 - `-windows-x86-64.zip` : portable archive built for 64-bit x86 architectures
- **macOS:**
 - `.dmg` : disk image installer built for macOS

GitHub

GitHub is the open-source repository platform adopted by our team.

Registration:

1. Open <https://github.com/signup>
2. Create a personal account by following the prompts
 - During registration, the system will ask you to verify your email address
 - We recommend selecting "United States of America" as your country/region

3. After registration, tell an administrator your username and wait for an invitation to join the organization. You can find it at <https://github.com/notifications>.

After that, you can view and modify repositories at <https://github.com/orgs/ftc32477/repositories>.

Onshape

Onshape is the cloud-based 3D modeling platform adopted by our team.

All team Onshape accounts use the free education plan.

Registration:

1. Open the education sign-up page:
<https://www.onshape.com/en/education/sign-up>
2. Fill out and submit the registration form.
