

Outreach & Public Relations

1. Basic Requirements

The following are supplementary requirements for Outreach & Public Relations.

Applications

- Web browser (Chrome, Edge, or Safari)
- LocalSend

Online Accounts

- Email address (@gmail.com or @outlook.com recommended)
 - WeChat Official Account
 - Bilibili
 - Douyin
 - Xiaohongshu (RED)
 - YouTube
 - TikTok
 - X (Twitter)
-

2. Responsibilities

The Outreach & Public Relations division is the team's megaphone and diplomatic corps. Core responsibilities include:

Engineering Notebook

The notebook content is written by the Hardware and Programming teams; Outreach is responsible for:

- **Layout:** design and typeset the engineering notebook
- **Material collection:** proactively accumulate promotional material
- Organizing season engineering documents
- Producing the engineering notebook required for competition

Promotional Material Collection

- Proactively reach out to other school teams to organize friendly matches, scrimmages, and new-season game analysis sessions
- Prioritize high schools in Haidian District that have FTC teams
- Focus on connecting with rookie teams — you are veterans now, and rookie teams need you

Team Apparel & Merchandise

- Design team uniforms and the team logo so people see "32477", not "Beijing National Day Experimental School"
- Make merchandise: stickers, badges, towels, scarves, masks, and more
- Goal: have every team wearing our merchandise

Sponsorship & Resources

- Identify and reach out to potential sponsors
- Write sponsorship proposals and business plans
- Maintain relationships with sponsors
- Manage the team's budget and finances

STEM Outreach

- Organize community STEM education events
- Connect with local schools and businesses
- Run robot demonstrations and hands-on experiences

Inter-Team Exchange

- Establish connections with other FTC teams
- Participate in inter-team exchange events
- Share experience and resources

Social Media Operations

- Manage the team's social media accounts across platforms
 - Publish team updates and event information
 - Produce promotional content
-

3. Sponsorship Development

The Essence of Sponsorship: Exchange of Value

Nobody gives you money for nothing. Sponsors provide funding and materials in exchange for exposure and brand recognition.

- Better results mean more exposure, and more exposure makes sponsorships easier to win.
- At this stage, start with small sponsorships: e.g., ask electronics factories to sponsor tools, screws, and other consumables.
- How to reach out: email larger companies; call Taobao vendors directly.

Business Plans

A sponsorship business plan should include:

- Event introduction (what FTC is and its influence)
- Team introduction
- Historical results
- Tiered sponsorship benefits: different amounts correspond to different logo exposure tiers

Case Study: Team 570's Commercial Development

- **Light & sound module:** Team 570 developed an FTC-specific light and sound module with customizable effects. Their tiered pricing embeds team numbers — 1 unit for ¥180, 4 units for ¥570, 6 units for ¥787 — subtly engraving team numbers into buyers' minds.
- **Custom servos:** They partnered with a servo factory to build custom servos under their own brand and developed companion tuning software, selling servos, power distribution boards, and accessories through their website — sales revenue funds the team.

Case Study: FGC Team China

- FGC (First Global Challenge) is like the Olympics of robotics. The 2026 event will be held in Incheon, South Korea, with teams from more than 190 countries.
- FGC Team China's business plan includes the event introduction, team introduction, historical results, and tiered sponsorship benefits. They have secured sponsorships from brands including Xiaomi and Huawei (rebranded as Kunlun Tech due to trademark restrictions).

4. Miscellaneous

(Refer to the relevant documents and handbooks)
